MOHAMED HAMDY

Senior Game Developer | Unity3D | DOTS/ECS | VR/XR | Mobile | Multiplayer

+20 106 619 1846 | mohamedhamdy231995@gmail.com | linkedin.com/in/mo-hamdy | m-hamdy23.github.io

PROFESSIONAL SUMMARY

Senior Game Developer with 7+ years of experience building immersive, production-ready games across PC, Mobile, VR, and WebGL. Deep expertise in Unity3D game architecture, real-time multiplayer networking, and Unity DOTS/ECS. Proven track record shipping titles on Meta Quest, iOS/Android, and WebGL — from solo indie projects to commercial MMOs. Seeking Senior Unity Developer roles in multiplayer, VR, PC, Mobile, or systems architecture.

TECHNICAL SKILLS

Game Engines: Unity3D, Unity DOTS/ECS, Unreal Engine
Programming Languages: C#, C++, Java, JavaScript, Lua
Multiplayer & Networking: Netcode for Entities, Nakama Server, Photon PUN/Bolt, Mirror, Firebase, AWS GameLift
XR Development: Virtual Reality (VR), Augmented Reality (AR), Mixed Reality (MR), Vuforia, Meta Quest
Architecture & Design: DOTS/ECS, ScriptableObjects, Design Patterns, Data-Driven Design, Algorithms
Tools & Workflow: Unity Editor Scripting, Node.js, Python, Git, CI/CD
Platforms: PC, Mobile (iOS/Android), WebGL, VR (Meta Quest)

PROFESSIONAL EXPERIENCE

Highstreet July 2023 – March 2026
Senior Game Developer | Architect

- Architected the full technical foundation of a VR MMO shipped on Meta Quest, covering networking, backend APIs, AI, and 15+ synchronized gameplay systems.
- Led Unity DOTS adoption across the team; converted world streaming and AI systems to ECS, enabling scalable multiplayer performance.
- Designed and implemented matchmaking, party, and friends systems powering solo and co-op multiplayer across WebGL and VR.
- Migrated server infrastructure from Unity Multiplay to Amazon GameLift; built Python CLI automation tools that significantly reduced fleet deployment time.
- Created a fully data-driven pipeline (Excel → ScriptableObjects) allowing designers to iterate on abilities and AI without engineering dependency.

Technologies: *C#, Unity, Unity DOTS/ECS, Netcode for Entities, Meta Quest, VR, WebGL, AWS GameLift, Node.js, Python*

ZINAD IT November 2021 – November 2023
Senior Game Developer | Team Lead

- Contributed to and customized 6+ serious games for cybersecurity awareness training, adapting gameplay systems for multiple enterprise clients.
- Architected and delivered multi-platform Unity solutions across WebGL, VR, Kinect, and mobile, ensuring consistent cross-platform performance.
- Built core gameplay systems including JSON-driven content pipelines, game flow, and validation logic; mentored junior developers.

Technologies: *C#, Unity, JavaScript, Firebase, VR, WebGL, Mobile, HTML/CSS*

Myriad Global Media 6-Month Contract

Senior Game Developer | Contract | Houston, TX (Remote)

- Delivered core gameplay systems for a large-scale HGV training simulator: AI traffic, vehicle systems, camera architecture, and training logic.
- Built structured training scenarios with validation, failure conditions.

Technologies: *C#, Unity, Simulation Design*

Egypt Games 2022 December 2020 – November 2021

Senior Game Developer

- Developed 10 Tawla (iOS/Android backgammon) — implemented ELO ranking, matchmaking, friend system, and adaptive AI using Nakama Server.
- Shipped and maintained the game post-launch on iOS and Android, iterating on features based on live player feedback.

Technologies: *C#, Lua, Unity, Nakama, Node.js, Firebase, iOS, Android*

Raskulls Game Studio July 2018 – December 2020

Co-Founder | Game Developer

- Co-founded the studio and led all technical development across PC, Mobile, and VR projects over 2.5 years.
- Architected networked multiplayer for Sky Striders (PC) using Photon Bolt — owned movement sync, abilities, match state, and disconnect handling end-to-end.
- Shipped Autoliv Explore 3D (iOS AR) — featured as a Unity Case Study on unity.com — and That Just Happened (VR, Unreal Engine).

Technologies: *C#, Unity, Unreal Engine, Photon Bolt, Photon PUN, Mirror, VR, AR, iOS, Android*

D-INNOVA Startup January 2014 – July 2017

Co-Founder | Software Developer

- Co-founded and led development of desktop business management solutions for Egyptian clients, including a restaurant management system.
- Built an AR menu visualization application using Unity and Vuforia.

Technologies: *Java, SQL, Unity, Vuforia, AR*

EDUCATION

9-Month Game Development Diploma 2017 – 2018

Information Technology Institute (ITI) | Intensive game development track: Unity3D, VR, design patterns, game programming, optimization.

BSc Computer Science 2013 – 2017

Benha University | Grade: Very Good

CERTIFICATIONS & AWARDS

- Won GIZ Virtual Reality Hackathon
- GIZ Training — Virtual Reality
- Dell EMC² — Cloud Infrastructure & Services
- Dell EMC² — Information Storage & Management

ADDITIONAL INFORMATION

Languages: Arabic (Native) | English (Professional Working Proficiency)

Availability: Open to full-time and contract engagements globally (remote or relocation)
